How committed is your board to your organization? Do your board members understand their role of governance vs. management? Is the board involved in setting a strategic direction for your organization? Do board members donate to your cause? All these questions can be explored through a board assessment, but what do you do with the results?

Join us to find out how to use a board assessment to strengthen your board. In this workshop, you'll learn how to improve your board's performance and increase board engagement and involvement.

Participants will review a number of sample tools and surveys, and will begin to develop a survey to bring back to their organization.
